MODERN GOLD COINAGE 1984

THE GOLD INSTITUTE/L'INSTITUT DE L'OR
1001 Connecticut Ave., N.W., Washington, D.C. 20036 U.S.A.

Introduction

Modern Gold Coinage—1984 provides complete information on all gold money issued in the calendar year 1984.

The statistics have been verified by the monetary authorities and are the result of extensive contacts and consultations with ministries of finance, central banks, government and private mints, and numismatic experts throughout the world.

Physical characteristics of coins are given in millimeters, grams and troy ounces, for which the equivalents are shown below.

1 millimeter	= 0.03937 inch	1 troy ounce	= 1.097 avoirdupois ounces
1 gram	= 0.03215 troy ounce	1 troy ounce	= 31.1 grams
1 troy ounce	= 480 grains	1 million troy ounces	= 31.1 metric tonnes

The first pages of this report provide a Summary showing the number of issues, the face value of each gold coinage issued, the amount of pure gold used for coinage in each issuing area, and the amount used worldwide. Pages following the Summary are alphabetically arranged by geographic area. These pages describe in detail every gold issue in 1984, with calculations carried to the fourth decimal.

Gold Coinages described in this book are money, denominated by the issuing authority in units of local currency or in troy ounces of pure gold content.

Number of Coins Issued refers to the number which became money in the calendar year 1984, with the following exception: if an issuing authority's coin accounting system is only on an issue basis and not on a calendar year basis, then the Official Limit (maximum authorized mintage) of the issue is shown and so noted.

Gold Medals and Medallions not issued as money are not included in this compendium.

The preparation of this study has been made possible only by the generous cooperation of mint directors around the world, the governors of central banks, ministers of finance, economists and numismatic experts who have contributed liberally of their time and energy for the realization of Modern Gold Coinage—1984. We gratefully acknowledge their invaluable aid.

How To Purchase These Coins

The gold coinages issued in 1984 were struck by the mints which are listed at the end of this book. Also, above the description of each coinage issue, is the full name and address of the mint which produced it.

Information on how to purchase these coins may be obtained from coin dealers, or by writing to the mint which produced them.
